

Domestic Violence

Leo Lai

What is IPV

- Intimate partner violence
- Physical violence, sexual violence, stalking, or psychological.
- It can occur among heterosexual or same-sex couples and does not require sexual intimacy.

Background

Data from CDC's National Intimate Partner and Sexual Violence Survey (NISVS) indicate:

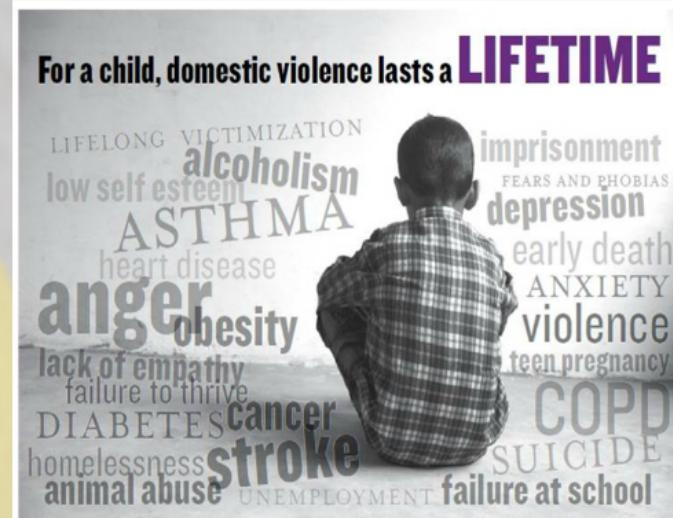

- 1 in 4 women, 1 in 10 men
- Over 43 million women and 38 million men experienced psychological aggression

Source: CDC's National Intimate Partner and Sexual Violence Survey (NISVS)

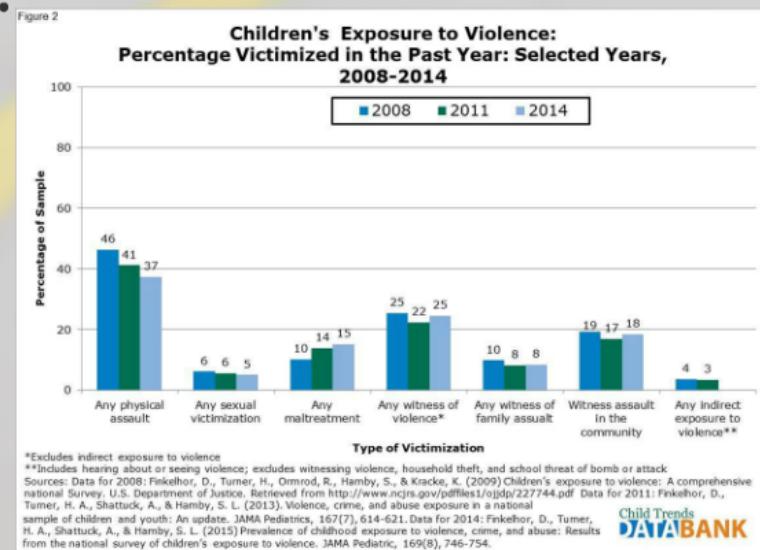

Research Statement

How does domestic violence has impacted on the child(ren) these days?

Why this topic

- 44% of all substantiated domestic violence events had children present.
- 47% are less than 6 years.

Source: Journal of Family Violence, 22(7), 2007

It Affects Children!

- Suffer symptoms of post-traumatic stress disorder
- Exhibiting aggressive, anxious, depressed or hyperactive behavior.
- More likely to become victims of dating violence than daughters of nonviolent parents.
- Having serious adult health problems.
- Risk of future victimization.
